## Navy Offering Opportunities To Re-enlistees

Providing the nation's new Navy with leaders and instructors in the more than fifty highly specialized fields, thousands of Navy war veterans have reenlisted since the cessation of hostilities, according to a statement today by George W. Johnson, Chief Boilermaker Recruiter in Charge of the Oakland Recruiting Station.

"Never before in modern Naval history has the Navy offered so many inducements for reenlistment," he said. "In addition veterans declare they can 'do better' in the Navy than they can in civilian life during the transition from war to peace."

Men with honorable discharges or discharges under honorable conditions — except medical — may reenlist in the Navy for two, three, four, or six years at their option and at the rating held at discharge provided they reenlist within thirty days. Chief Johnstone explained. They are also entitled to thirty days leave and transportation at five cents a mile to any leave address they designate, plus the balance of their mustering out pay in a lump sum.

Men reenlisting after thirty days leave before the expiration of ninety days, Chief Johnstone pointed out, receive the same benefits, except no enlistment leave may be granted.

## INSURANCE TALKS FOR VETERANS

Because of the survey made by Albany Post No. 292 The American Legion in reference to the "National Service Life Insurance" as issued to the veterans of World War and the conversion privileges and other features which the veterans believe should be corrected, Heribert Jollinger, contact man of the Veterans' Administration for National Service Life Insurance" will be the guest speaker at the regular meeting of Albany Post No. 292.

The American Legion Friday Evening March 1st in the Albany Memorial Building. Jollinger is also the Second Vice Commander of Berkeley Post No. 7, the American Legion. An invitation is extended by Commander Russell Rothchild on behalf of Albany Post for every veteran of World War 2 who wishes to get up to date information on G. I. Insurance to be the guests of Albany Post.

In keeping with the question of "National Service Life Insurance" Albany Post No. 292 on Feb. 1st passed a resolution asking that the National Department of The American Legion take immediate steps to have Congress or the Veterans Administration liberalize some of the features of conversion in regard to the insurance the veterans carried during their time in active service.

The resolution reads:

WHEREAS, The United States Veterans Administration is making efforts and advising discharged Veterans of World War 2 to convert their "National Life Insurance" to ordinary, Twenty Payment, or Thirty Payment Policies, and,

WHEREAS, The Maximum amount of reconverted insurance the average Wage Earning Veteran can afford to carry will not exceed \$5,000.00 or less, and the options of payment in case the insurance becomes payable on the death of the insured veteran are based on an installment payment plan of \$5.00 (plus or minus) per month, per One Thousand Dollars (\$1,000) of insurance for two hundred forty months (20 years). Then when a Veteran's insurance became payable on a \$5,000.00 converted policy, the payments to the beneficiary would be \$25.00 per month for Twenty Years, and,

WHEREAS, When an insurance policy becomes payable, then in the time a beneficiary needs larger sums of money immediately for the extra ordinary expenses of illness and burial than dribbles of \$5.00 per One Thousand Dollars per month, and,

WHEREAS, The conversion Privileges granted the "War Risk Insurance" Policies of World War No. 1 are more liberal and varied in the method of payment, (beneficiary can be paid in cash on the death of the insured or part in cash and the balance over a period of time as chosen by the insured) than the conversion privileges of the "National Life Insurance" issued for the veterans of World War No. 2, and,

WHEREAS, There are insurance companies who can and do offer the World War No. 2 Veterans liberal policies with features that far exceed the beneficiary payment features of the options granted in a converted policy of National Life Insurance for the same or a little greater cost so there little advantage for the Veteran to convert his insurance to the permanent types as offered by the United States Veterans Administration, now, therefore, be it,

RESOLVED, Albany Post No. 292, The American Legion in meeting assembled February 1, 1946, requests the Tenth District Council of the American Legion to take immediate action to have the American Legion Department of California present the matter of liberalization in the options of payments for converted "National Life Insurance Policies" to the National Department of the American Legion or the Legislative Committee of the National Department, to the end that, the options of payments of converted National Life Insurance issued to World War No. 2 Veterans, be changed to be equal or be better than the options of converted War Risk Insurance of World War No. 1, and be it further

RESOLVED, Upon approval of this resolution by the State Department that Albany Post No. 292 be authorized to release this resolution

1. "I favor the appointment of a citizen committee by the council, composed of architects, builders, businessmen and resident property owners to study and make recommendations to the park planning, and zoning commission for changes which will promote the growth and development of our commercial, light and heavy industrial areas, but not to the detriment of adjacent residential property."

## CLOTHING DRIVE BIG SUCCESS

Albany collected more than three tons of shoes and clothing for the people of war-torn Europe, according to an announcement by Fire Chief Fred Pimental who directed the local drive.

Pimental's report recorded 6220 pounds as the amount donated and collected by civic, church and service groups.

Arrangements were made for collection of clothing by the Fire Department where it was impossible for the donor to reach the receiving depots. In almost every case, Pimental said, the clothing and shoes were boxed and tied according to the suggestion of the department.

"Albany certainly is to be praised for the grand job it did to help out the devastated people of Europe," Pimental declared.

## THE ROAD TO HEALTH

COUGHING? SEE A DOCTOR  
By R. S. WHITTAKER, M.D.

Time and time again when I am at the clinic of our hospital men and women come in complaining of feeling poorly and having a bad cough. When I ask them if they have had the cough long they often say it has been hanging on for months.

"Have you done anything about it?" I ask.

Usually the answer is something like this:

"Well, doctor, a friend gave me some cough syrup. I've been tak-

ing it, too, but it doesn't seem to help much."

I explain to such a patient that before I can do anything for him I want a picture of his lungs, and arrange for him to have a chest X-ray. All too often when I look at the X-ray picture I find that the patient has "lung trouble," or tuberculosis. The X-ray indicates that he has had the disease for many months, perhaps for a year or two, that he had it long before he began coughing. Although many people think that everybody with tuberculosis coughs, actually a person may not begin coughing until months after he gets the disease.

Tuberculosis, or consumption, is a disease caused by a small germ. We get these germs from somebody who has tuberculosis. We may get the germs from kissing the person, from using the same dishes he used or even from breathing the air in a room where a person with the disease has been. Most people come in contact with tuberculosis germs at one time or another, but if our bodies are healthy they fight off the germs and no harm may be done.

If we are in a run down condition, the germs are more likely to work their way into one of our lungs and hide there. Unfortunately, one may have the disease a

long time without feeling any pain and so we do not know we are ill, even though a lot of damage has been done to the lung. After a while, however, we begin to feel tired all the time, we may lose weight, we do not want to eat and we start coughing. Sometimes we cough up blood.

When we get to feeling all-in and start coughing, some good friend is apt to suggest that we take a "tonic" or a cough syrup. But no tonic, or cough syrup and no drug will kill tuberculosis germs or cure tuberculosis.

The smart thing to do when we feel bad is to find out why we feel bad. When there does not seem to be any reason why we are tired all the time and are losing weight, we should go to a clinic or a doctor. If the doctor thinks there is something seriously wrong, he will have an X-ray taken of our lungs. That is the only way to find out for certain whether the germs have damaged the lungs. If they have not, the doctor will know that we haven't tuberculosis and will tell us what is wrong.

If the lungs are diseased, the doctor will also tell us what to do. He will say that tuberculosis can be cured, but it is easier to cure it when the disease first gets hold of us than after the germs have damaged the lung. That is why we should go to the doctor when we first begin to feel bad.

Rest, not drugs, helps to cure tuberculosis. When we have tuberculosis we need rest in bed for 24 hours a day. Doctors usually re-

commend that people with tuberculosis go to a hospital built especially to take care of patients with this disease. There is at least one of these hospitals in every state and in many counties, supported by the state or county, for the care of tuberculous people. The doctor knows where these hospitals are and how to arrange for their patients to get in them.

Many people think they can rest at home, and sometimes the doctor says this is all right. Usually, doctors prefer for their patients to go to a tuberculosis hospital. When we stay at home we may be tempted to get up when company comes, or just to have dinner with the family, but we should stay in bed all the time until the doctor says it is safe to get up. Another reason it is better to go to the hospital is that if we stay at home we may give the disease to other members of the family.

We should try to avoid being seriously sick by going to the doctor when we first begin to feel bad. Then we should do what he advises us to do.

Equip your home for modern living -for now and the wonderful years ahead!

• Will your kitchen be planned and equipped with what you need, where you need it, when you need it?

• Will you have plenty of refrigerated food storage space for day-to-day food needs—plus bulk storage for frozen foods now becoming so popular?

• Will your home have Adequate Wiring—with outlets and light switches properly spaced, with plenty of wire circuits and wire sizes big enough to give you carefree electrical living now and for years to come?

• Will your Automatic Water Heater be at least 30 gallon capacity to deliver plenty of hot water at the temperature you like and without waiting?

• Will you have an automatic home laundry with a clever new washer, ironing machine and a new, ingenious clothes dryer?

• Will you put your furnace in a basement or install a forced-air furnace in a main floor closet or up under the roof in the attic?

There are more items to look into in building a house today because there are more comforts and conveniences built into a modern home and it is a better home in which to live.

Kitchens are planned to save steps and with a place for everything and everything right in its place. Every room is better lighted. There are more light switches and more outlets in which to connect your host of appliances.

As you plan now for a new home or modernize your present one, equip it for modern living. Make a list of anticipated needs for the years to come. Insist on Adequate Wiring. Put in a full-size water heater. Keep years ahead with an automatic forced-air Gas furnace. Get all the advice you can from your appliance dealer, your contractor, architect or this company.

Film Showing

At the Albany

Shirley Temple is now playing this week Thursday, Friday and Saturday in "Kiss and Tell".

Of keen excitement to Albany youth is the new serial "The Purple Monster Strikes" which started Friday night and Saturday matinee.

The story revolves around the desperate search for a strange and eerie shadow-man, the Purple Monster, an inhabitant of Mars, by a young attorney and his aide, the pretty niece of a respected scientist. The two are armed with only one piece of knowledge, that the Monster is on this planet to steal the plans for the interplanetary rocket ship invented by the scientist. But, they do not know the identity of the Monster.

Each of the exciting chapters is packed with adventure and spine-chilling encounters with the mysterious shadow creature who has at his command many weird inventions of Mars.
